

Eng Lim Goh, PhD

Bio:

Dr. Eng Lim Goh joined SGI in 1989, becoming a chief engineer in 1998 and then chief technology officer in 2000. After acquisition, HPE appointed him vice president and SGI chief technology officer. He oversees technical computing programs with the goal to develop the next generation computer architecture for the new many-core era. His current research interest is in the progression from data intensive computing to analytics, machine learning, artificial specific to general intelligence and autonomous systems. He continues his studies in human perception for user interfaces and virtual and augmented reality.
