

Sébastien Denvil

Bio:

Sébastien Denvil is a CNRS research engineer at the Institut Pierre Simon Laplace (IPSL) with more than 15 years experience in climate simulations, High Performance Computing and e-science infrastructure. He is the head of the IPSL Climate Modelling Centre Data Platform and one of the technical chair of the CMIP like simulations platform. He is chairing the CDNOT (CMIP Data Node Operation Team), is a member of the WGCM Infrastructure Panel (WIP), is a member of the ENES (European Network of Earth System modelling) data task force and is one of the three European representatives in the ESGF Executive Committee. He is and has been PI in several international projects (ESGF, IS-ENES2, ES-DOC, IS-ENES, METAFOR, G8 ExArch).
