

Young C. Kwon

Bio:

I have worked at Korea Institute of Atmospheric Prediction Systems (KIAPS) since 2014. KIAPS was founded at 2011 with a mission of developing a next generation global model for Korea Meteorological Administration (KMA). I am a head of Forecast Division of KIAPS, which is responsible for model physics, diagnostics, verification and computer management. Before joining the KIAPS, I worked at EMC/NOAA at US for 8 years, and KMA at Korea for 6 years with duty of developing NWP models. I received a Ph. D. in meteorology at Pennsylvania State University, and Ms. C and Bachelor degree from Seoul National University.
