

Reimagining Python Education for Geoscience: Lessons from Project Pythia's Modernization

SIParCS Internship

Christian Okyere

Mentors: Julia Kent, Orhan Eroglu

July 29, 2025

Introduction

- I'm an undergraduate at Colby College, studying Mathematics and Computer Science.
- Passionate about open-source, and web development

What I worked on this summer

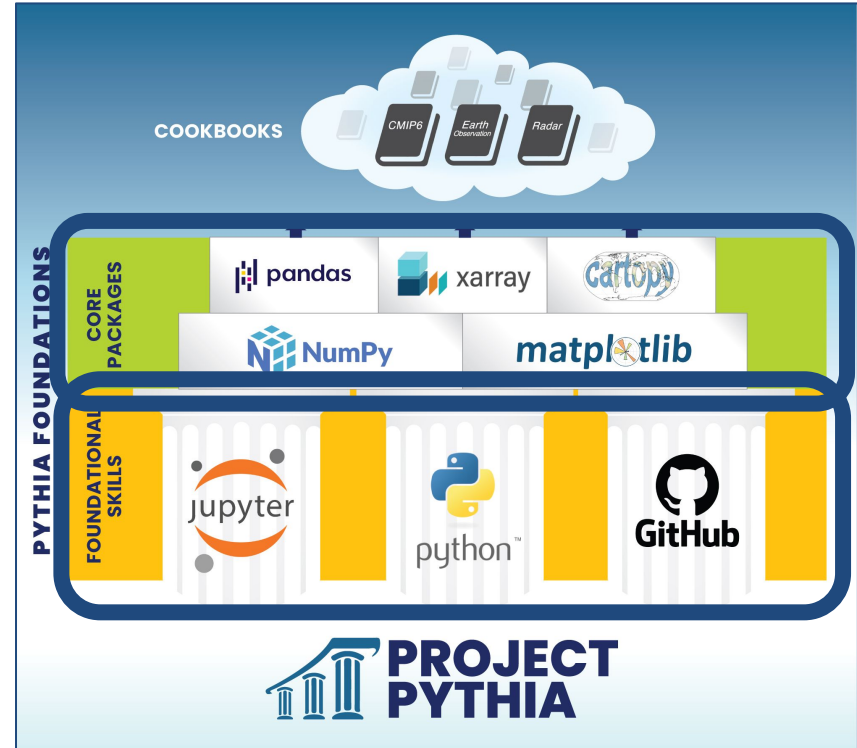

- This summer, I worked with the Project Pythia team to modernize and improve their educational infrastructure.
- My role focused on helping transition from Sphinx-based (Jupyter Book) to MyST Markdown (Jupyter Book 2) for improved maintainability and cross-referencing
- Additionally, I helped design some UI components of the project like the footer.

What is Project Pythia?

Mission: An open-source platform teaching Python to geoscientists.

Our structure includes:

- **Foundational Skills:** Jupyter, Python, and GitHub
- **Core Packages:** NumPy, pandas, xarray, matplotlib, cartopy

Why We Do What We Do

Importance

- Used by scientists around the world
- Supports community-driven learning

Map of Total Foundation Active Users by Country

This map displays the number of active users per country for Pythia Foundations for the entire life of Project Pythia.

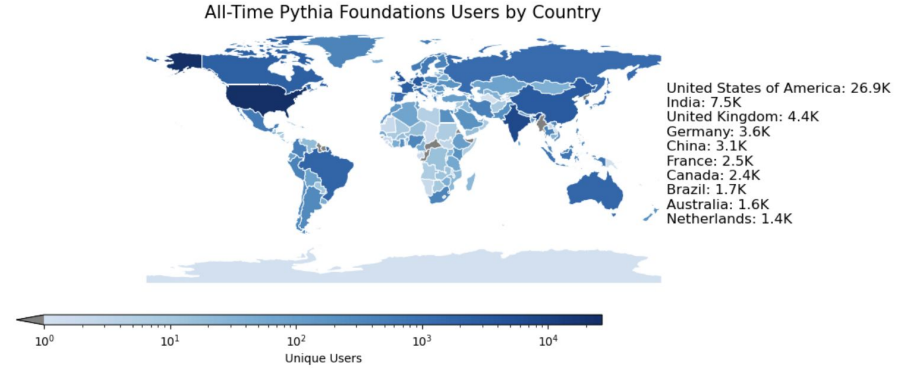

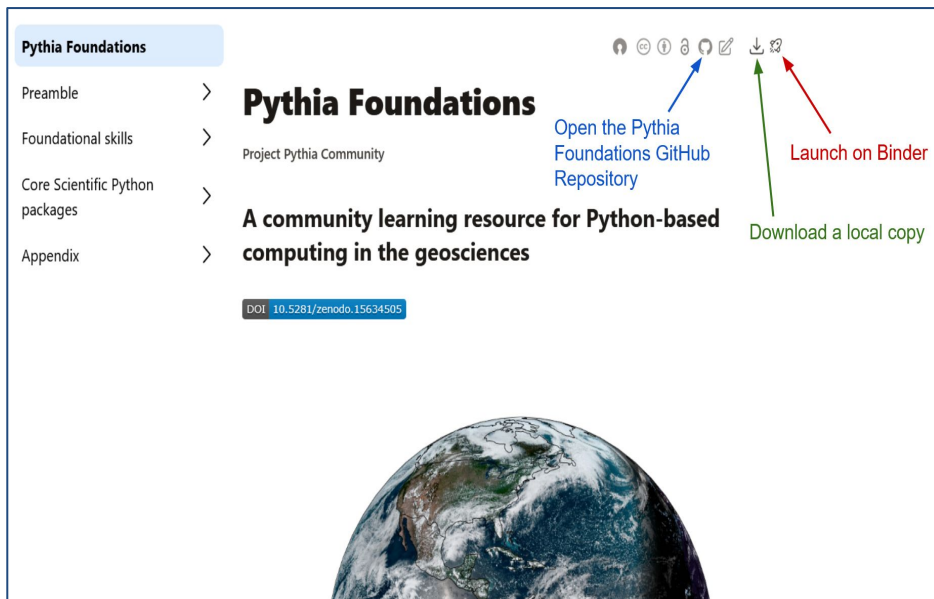

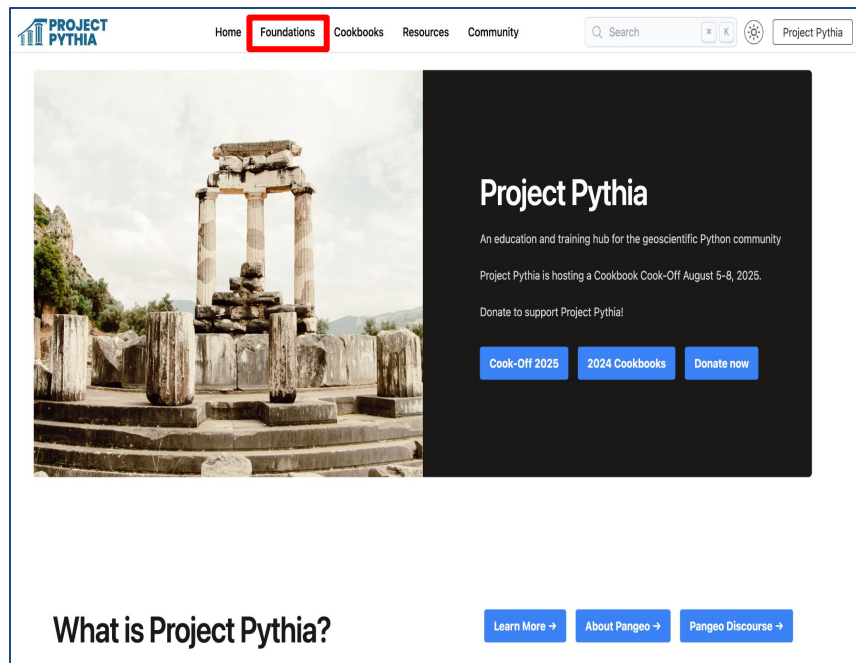

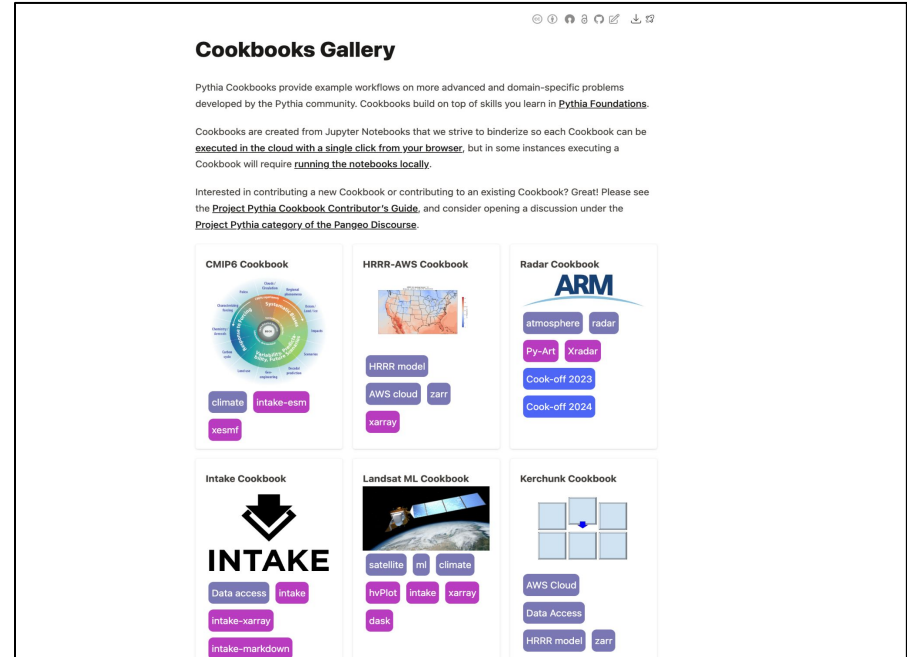

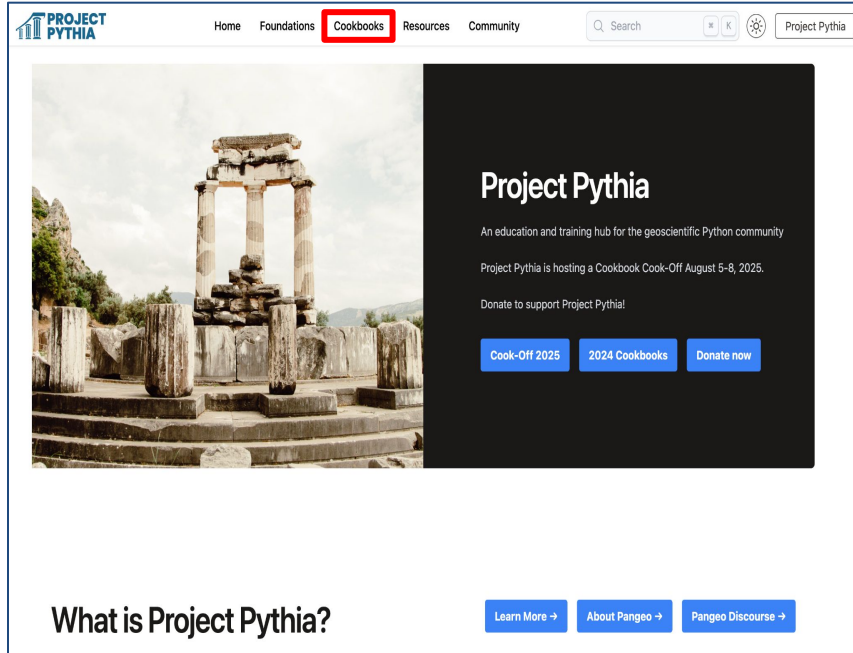

Figure 3: Map of the number of active users per country for Pythia Foundations for the entire life of Project Pythia.

Foundations Page

Foundations: Jupyter Book teaching fundamental Python skills and packages

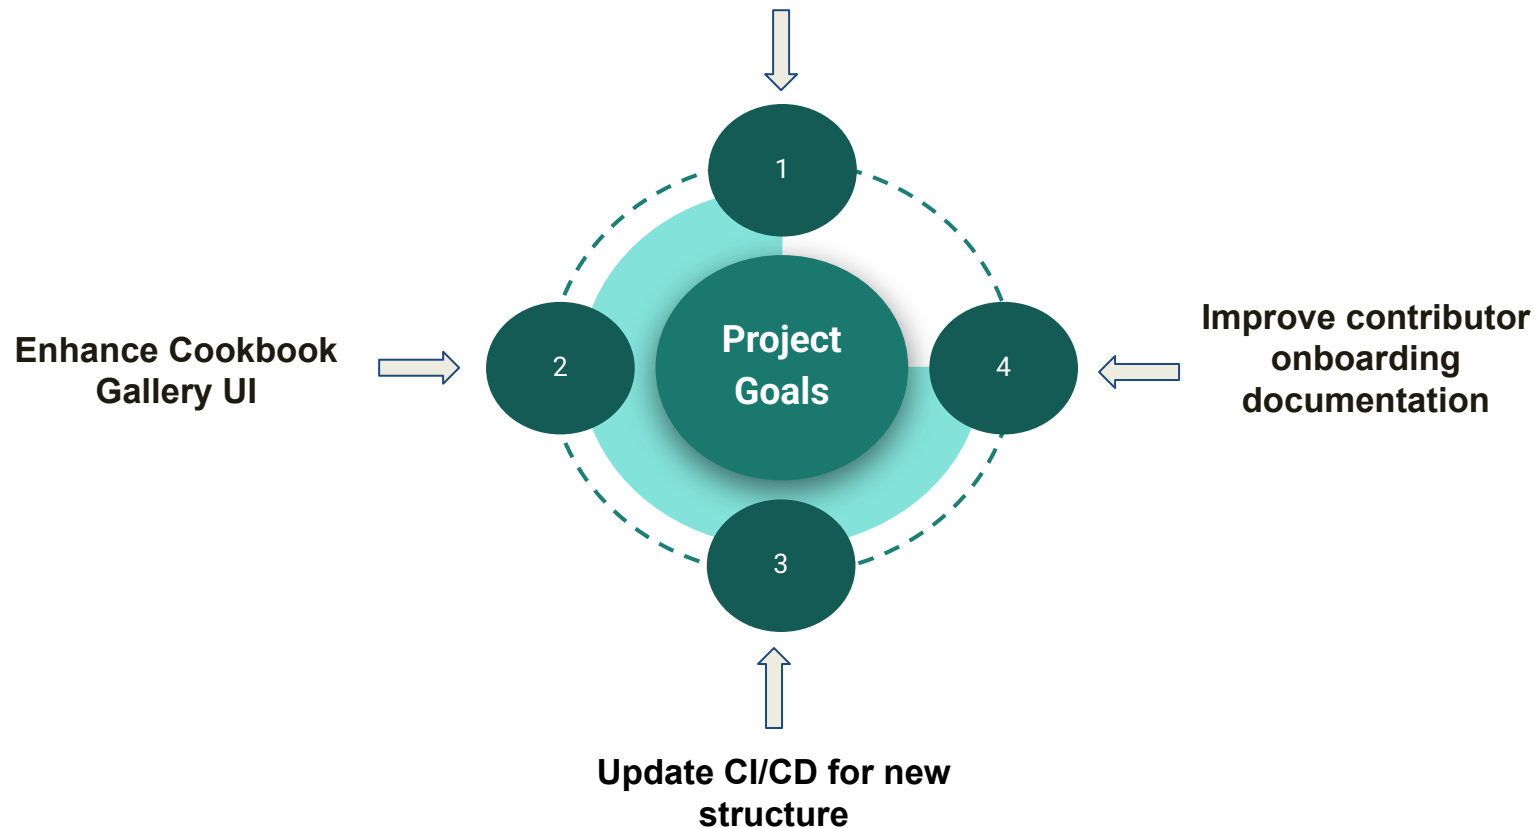

Cookbooks Page

Cookbook: Smaller domain-specific Jupyter Books that demonstrate end-to-end workflows.

Project Goals

Migrate existing Sphinx Cookbooks to MyST

Why Migrate?

Compatibility

Problem

Jupyter Book 2 dropped support for Sphinx-style content.

Attempting to build Sphinx-based Cookbooks led to:

- Frequent build errors
- Broken navigation
- Inconsistent rendering across browsers and devices

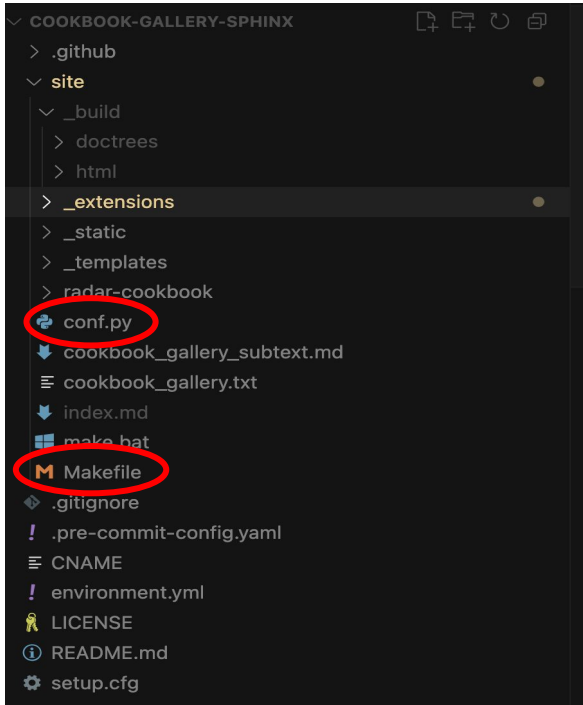

Why Migrate?

Sustainability

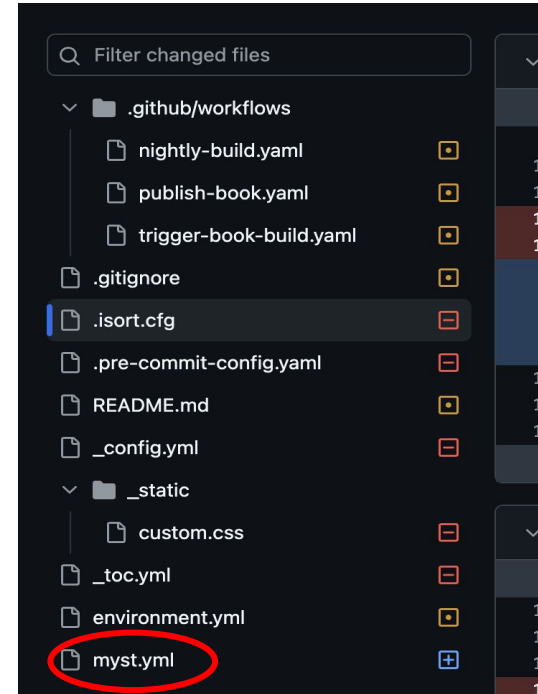

Problem

- The old Sphinx-based setup had too much **boilerplate code** in each repository

Solution

- MyST Markdown offers minimal setup: **fewer files** and **easier configuration**

Why Migrate?

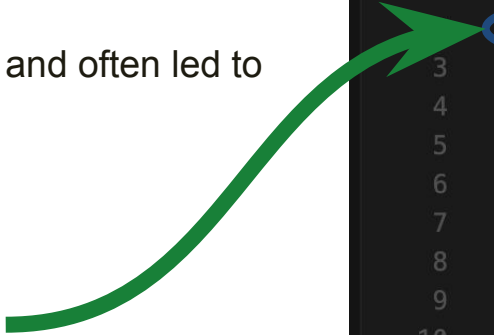

Maintainability

Problem

- Project Pythia has **75+** GitHub repositories
- In Sphinx, updating things like the footer or navbar had to be done **manually** in every repo
- This was **time-consuming** and often led to **inconsistencies**

Solution

- MyST solves this with the ***extends*** keyword

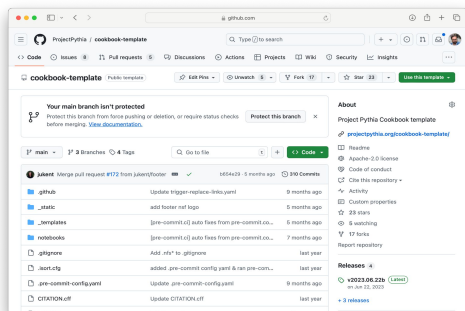

```
! myst.yml ×
! myst.yml
1  version: 1
   extends:
3  - https://raw.githubusercontent.com/projectpythia/mystdocs/main/myst.yml
4  project:
5    title: Landsat ML Cookbook
6    authors:
7      - name: Demetris Roumis
8        url: https://github.com/droumis
9    github: https://github.com/projectpythia-mystdocs
10   copyright: '2024'
11   toc:
12     - file: README.md
13     - title: Preamble
```

How To Migrate

*Unexecuted notebooks,
environment description,
config files*

*All dropped into a copy of Pythia's
[Cookbook Template](#) repository*

GitHub Actions

binder

Jetstream2

jupyter {book}

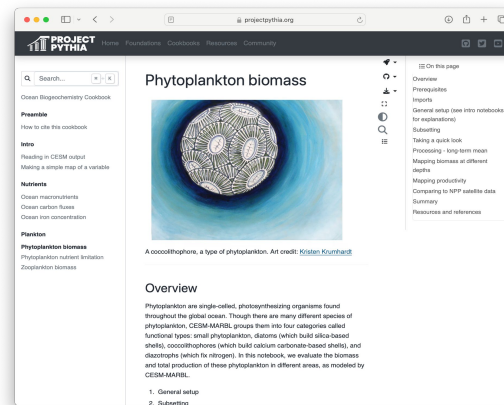

GitHub Pages

Rendered Cookbook is fully
reproduced from sources:

- For any push to main branch

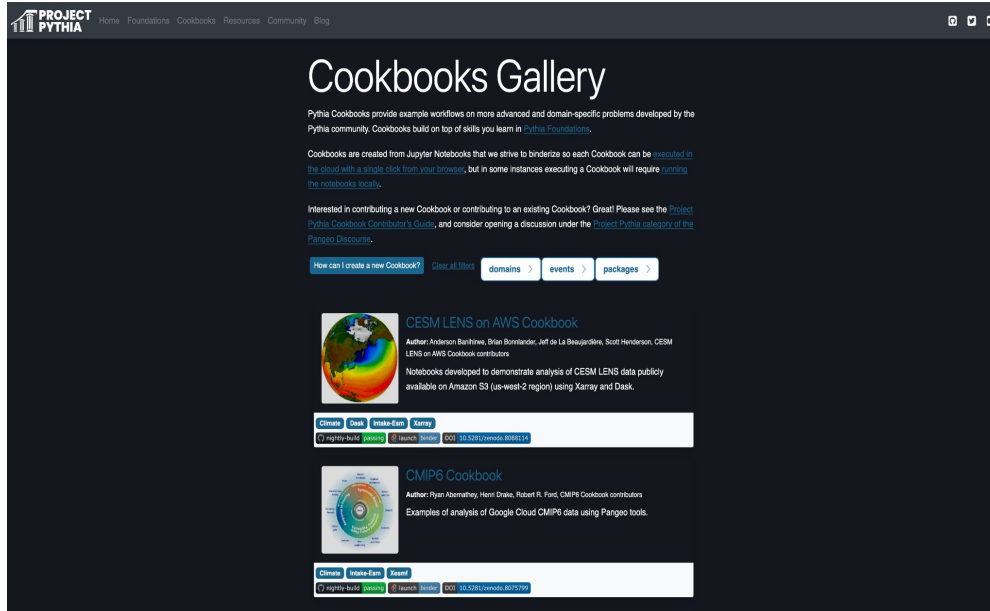

Publicly visible, binderized web pages

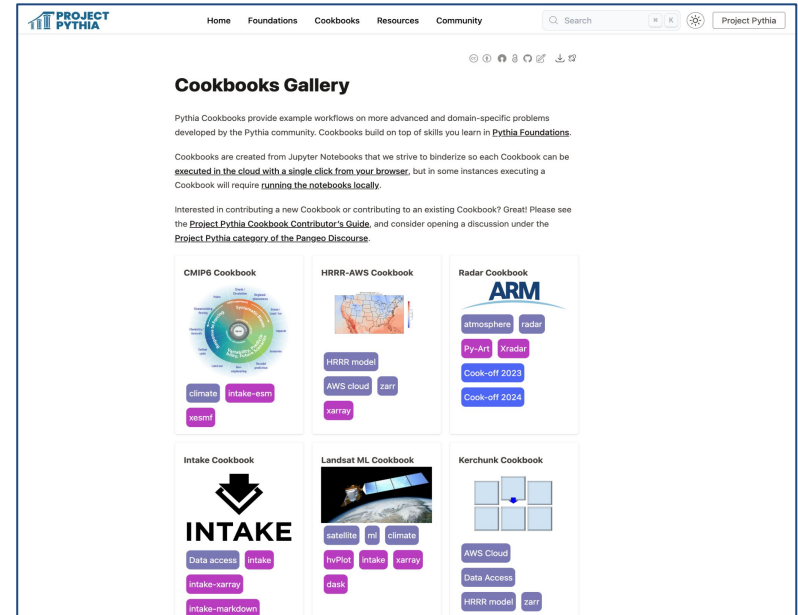

From the [Ocean Biogeochemistry Cookbook](#)
by Lev Romashkov and Kristin Krumhardt

Sample Images of Mystified Books

Before

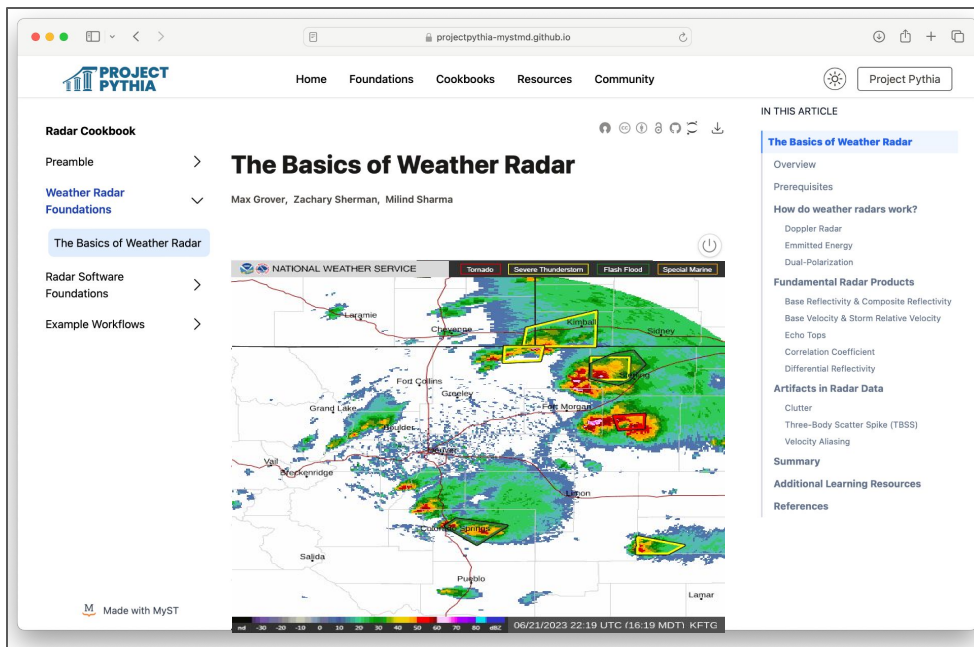

After

Cookbooks Gallery Page

- Contains all the current cookbooks

Sample Images of Mystified Cookbooks

Radar Cookbook

- A domain-specific tutorial that guides users through working with radar reflectivity data using Python tools such as **xarray**, **metpy**, and **matplotlib**

After
(still in prod)

Summary

The Transitioning Process

- Sphinx-based Jupyter Book → MyST Markdown format
- Static pages with rendering issues → Improved HTML, CSS, and JavaScript
- Fragmented documentation → Streamlined Contributor Guides and templates

Next Steps

Next Steps

- Add newly converted Cookbooks to the Gallery
- Finalize Cookbook Gallery UI fixes (filtering, rendering, navigation)
- Polish and publish Contributor Guides
- Open pull requests to merge MyST changes back into main repositories and scrub any stale unused code
- Hackathon/ Cook Off – **August 5 - 8**

Thank you

Special thanks to **Julia Kent** for her mentorship, and guidance throughout this internship. Her feedback made this a truly rewarding and educational experience.

Additional thanks to all the **Pythia Team** for all the resourceful collaborations, and **MystMD Team** for launching timely releases to support the project.
